Test Recruitment Assistant Agent

How do i evaluate Candidate application

The screenshot displays the Salesforce Agentforce Builder interface for a 'Recruitment Assistant Agent - Version 1 (Draft)'. The interface is divided into three main sections: 'Explorer', 'Preview', and 'Preview Settings'. The 'Explorer' section on the left shows a tree view of the agent's components, including 'Agent Definition', 'Settings', 'Agent Details', 'System', 'Language Settings', 'Subagents', 'Agent Router', 'General FAQ', 'Off Topic', 'Ambiguous Question', 'Variables', 'Connections', and 'Data'. The 'Preview' section in the center shows a 'Live Test Mode' with a user input: 'How do I evaluate a candidate application?'. The agent's response is a list of steps: '1. Review the resume and cover letter for relevant experience, education, and skills.', '2. Check for alignment with the job description and required qualifications.', '3. Assess soft skills (communication, teamwork) through written materials or screening calls.', and '4. Look for career progression achievements.'. The 'Preview Settings' section on the right shows 'Context Variables' with a warning icon and a 'Summary' tab. The 'Summary' tab shows the agent's reasoning: 'The user asked the agent to verify whether its prior response about evaluating a candidate was correct. The agent routed to the GeneralFAQ subagent and, without invoking any tools, replied that the earlier answer was correct and offered to provide a checklist or template as a next step.'. The bottom of the interface has a 'Trace' button and a 'Variables' section.
